RE: Daniel Harris - EXPIRED 11/02/2023

DOB: 01/19/1985

MRN: AML015

Dr. Park,

Your patient Daniel Harris died yesterday 11/02/23 at 16:42 in our ICU. Summary below:

Background: 38yo M with AML (BCOR mutated, adverse risk) dx 8/2022. Received 7+3 starting 08/09/22 and alloTx from his brother. Achieved CR initially but relapsed mid July 2023). Was initially started von Ven+AZA, then Salvage CTx with FLAG-IDA.

Final Admission (10/28/23): Presented with fever, ANC 0, plt 8K while on salvage FLAG-IDA. Developed severe septic shock from Pseudomonas bacteremia. Despite maximal support including mechanical ventilation, 3 pressors, CRRT for AKI, developed refractory shock.

Death: Family (wife Sarah, parents) made decision to withdraw support after multiorgan failure developed. Expired peacefully 11/02/23 at 16:42.

Cause of Death:

1. Septic shock
2. Pseudomonas aeruginosa bacteremia
3. Relapsed/refractory AML

Wife requests you call her: 555-0921

Please fax death certificate info to 555-7234.

Contact ICU at 555-1000 with questions.
