

PALLIATIVE CARE TRANSITION NOTE

COMMUNITY HOSPICE REFERRAL

Date: June 30, 2023

From: Regional Cancer Center

To: Haven Hospice Admissions

RE: Sharon Roberts (DOB: 09/26/1953, MRN AML038)

IMMEDIATE NEEDS: Home hospice evaluation requested - patient wishes to die at home

DIAGNOSIS:

- Primary: Refractory AML with complex karyotype
- Prognosis: Days to weeks

BRIEF HISTORY:

69F diagnosed 08/22/22 with adverse-risk AML (complex karyotype with -5, -7, +8, +21). Treated with venetoclax/azacitidine starting 08/30/22.

- Best response: PR after 3 cycles (25% blasts)
- Progressed month 7 (March 2023)
- Attempted salvage with decitabine/venetoclax - no response
- Current: Blast crisis, declining further treatment

CURRENT CONDITION:

- ECOG 4 (bedbound)
- Transfusion dependent (declined last 3 days)
- Confused at times
- Minimal oral intake

SYMPTOMS REQUIRING MANAGEMENT:

- Pain: 7/10 bone pain
- Dyspnea: On 2L oxygen
- Anxiety: Especially at night

CURRENT MEDICATIONS:

- Morphine 15mg PO q3h
- Lorazepam 0.5mg PO q6h PRN
- Ondansetron 4mg PO BID
- Dexamethasone 4mg daily

FAMILY: Daughter Lisa is primary caregiver (RN), very involved. Son flying in from Seattle.

CODE STATUS: DNR/DNI/DNH

Please expedite. Family understands prognosis.

Contact: Dr. Martin (555-0892)

[EMR Addendum 07/03/2023: Per hospice, patient died peacefully at home 07/02/2023 at 08:15 AM with family present.]
