RE: URGENT HOSPICE ADMISSION - Albert Ward (DOB: 01/31/1950, MRN AML069)

Dear Hospice Team,

Please accept this fax as a formal referral for Mr. Albert Ward for immediate admission to home hospice services.

DIAGNOSIS: End-Stage Refractory Acute Myeloid Leukemia (AML) with adverse-risk mutations (**TP53** and **SF3B1**).

PROGNOSIS: Extremely poor. Life expectancy is estimated to be **less than two weeks**.

BRIEF HISTORY: Mr. Ward was diagnosed with high-risk AML/MDS-overlap (May 24, 2021). He received treatment with Azacitidine since early June but demonstrated primary refractory disease with rapid progression after only five cycles. He is not a candidate for any further therapy. He has been fully informed of his prognosis and his expressed wish is to die at home with a focus on comfort. He was discharged from the hospital today.

HOSPICE ORDERS - PLEASE INITIATE:

- **Pain:** Morphine Sulfate Oral Solution 20mg/mL. **Give 10-20 mg PO every 2 hours as needed for pain or shortness of breath.**
- **Anxiety/Agitation:** Lorazepam Intensol 2mg/mL. **Give 0.5-1 mg sublingually every 4 hours as needed.**
- **Nausea:** Haloperidol 2mg/mL. **Give 0.5-1 mg PO/SL every 6 hours as needed.**
- **Secretions:** Atropine 1% ophthalmic drops. **Give 2 drops sublingually every 4 hours as needed.**
- **Transfusion Plan: DO NOT transfuse to target a number.** Patient may be transfused with pRBCs or platelets at an outpatient facility **ONLY** for severe, active bleeding or profound symptomatic dyspnea that is refractory to opioids. Please call me directly to discuss before sending the patient for any transfusion.

He has a PICC line in place which can be used for phlebotomy if needed but should not be used for routine infusions.

Please confirm receipt of this fax and contact the family to arrange an admission visit for today. My mobile number is 555-123-4567 for any urgent questions.

Thank you for your rapid attention to this matter.

Sincerely,

Dr. Benjamin Carter

NB: patient died on 9th of December 2021
